### **Oversize Common Carrier Delivery**

All orders with any quantity of shades or blinds or any continuous valance 90" or more in width are considered oversize. Therefore, a net shipping charge per oversized unit will be assessed.

Oversized orders that require expedited shipping will be quoted and charged accordingly.

Please see General Information for additional freight and shipping charge information.

\* Light Dimming fabrics provide category C, opaque light control because even when the vanes are completely closed they DO NOT completely seal off all incoming light. See vane closure diagram on page 14 for a visual reference.

### A. Glare Reducing

Softly filters light and reduces glare. Images, shapes and people can be seen clearly. Provides the least amount of light and shape screening.

### B. Filtering

Filters strong light. Images, shapes and people can be seen with some clarity. Provides a modest degree of light and shape screening.

### C. Shading

Significantly reduces light. Images, shapes and people cannot be seen clearly. Provides a moderate to strong degree of light and shape screening.

### D. Blocking

Dramatically reduces light. Images, shapes and people are not distinguishable. Provides privacy against most all direct light and shape screening (except minimal light that may seep through closed or overlapping opaque/blackout vanes).

### E. Blackout

Blocks out virtually all light (except light that may enter on the sides of the shade) for maximum privacy and darkness.

| Tilt Only (available on standard loop control only)                           | Yes                                 |
| Two-On-One Headrail Option<br><small>Not available with Cordless Lift</small> | Yes                                 |
| Control positions   | Right or Left                       |
| <b>Motor Positions</b> - Bliss, Somfy   | Right or Left * (see note below)    |
| <b>Control Positions</b> PowerWand  | Right or Left                       |
| <b>Wand Color</b> - PowerWand   | White, Black, Brown, Vanilla, Gray  |
| <b>Wand Length</b> - PowerWand  | 1 ft, 2 ft, 3ft,<br>4 ft, 5 ft, 6ft |
| Spacer blocks   | Yes                                 |
| Extension brackets  | Yes                                 |
| Hold-down brackets  | Yes                                 |
| Back cover (Inside or End Mounts)   | Yes                                 |
| Dust cover (Outside Mounts)   | Yes                                 |
| Cord length (See Cord Loop Drop Chart)  | Yes                                 |
| Specialty shapes  | No                                  |
| Tile cut-out  | No                                  |

Note: For 2 on 1 shades, motors must be placed at the edges(far-left and far-right) of the shades.

## CORD LOOP DROP CHART

| SHADING HEIGHT  | CORD LOOP DROP     |
|-----------------|--------------------|
| 16" to 26-7/8"  | 1 ft. (white-only) |
| 27" to 39-7/8"  | 2 ft.              |
| 40" to 59-7/8"  | 3 ft.              |
| 60" to 83-7/8"  | 4 ft.              |
| 84" to 107-7/8" | 5 ft.              |
| 108" to 120"    | 6 ft. (white-only) |

| OPTIONAL CORD DROPS (White Cord Only) |                |
|---------------------------------------|----------------|
| CORD DROP                             | INCREMENTS     |
| 6' - 12'                              | 6" increments  |
| 12' - 16'                             | 12" increments |

NOTE: 18" white only cords available upon request

## MOUNTING REQUIREMENTS

| INSIDE MOUNT   |        |
|--|--------|
| Standard, Cordless, Bliss Automation, Somfy Automation & PowerWand |        |
| Minimum casement depth*  | 1"     |
| Minimum casement depth*, fully recessed                            | 3-3/8" |
| Minimum rear fabric clearance                                      | 1/8"   |

| OUTSIDE MOUNT  |      |
|--|------|
| Standard, Cordless, Bliss Automation, Somfy Automation & PowerWand |      |
| Minimum mounting surface height                                    | 1"   |
| Recommended width overlap per side                                 | 3"   |
| Minimum rear fabric clearance                                      | 1/8" |

| END MOUNT  |        |
|--|--------|
| Standard, Bliss Automation, Somfy Automation & PowerWand |        |
| Minimum mounting surface depth*                          | 1-1/4" |

\* Add 1/4" to minimum depth dimensions if optional back cover is used for inside or end mounts.

\* End Mount not available on Cordless Lift and 2 on 1 applications.

The external battery pack available for Bliss 1.1 DC or for Sonesse 28 WireFree RTS / ZIGBEE DC are approximately 10" in length and 1" x 1". Consider ordering one of the Battery Pack Extensions below for mounting flexibility.

### BLISS

48" Battery Pack Extension (Motor to Battery) Part #62207000

### SOMFY

10" Battery Pack Extension (Motor to Battery) Part #9018623

48" Battery Pack Extension (Motor to Battery) Part #9016736

96" Battery Pack Extension (Motor to Battery) Part #9018624

## FINISHED DIMENSIONS

| Dimensions apply to standard loop control, cordless lift and PowerWand (PW single panel and PW 2 on 1) |                                 |
|--|---------------------------------|
| INSIDE MOUNT-Standard Deductions   |                                 |
| Headrail   | 3/16" less than ordered width   |
| Fabric width--Std Loop, RC   | 1" less than ordered width      |
| Fabric width-PowerWand   | 1-1/16" less than ordered width |
| Fabric width - Cordless Lift   | 13/16" less than ordered width  |
| Shading height-All   | 1/8" less than ordered height   |
| OUTSIDE MOUNT-Standard Deductions  |                                 |
| Headrail   | ordered width                   |
| Fabric width--Std Loop, RC   | 3/4" less than ordered width    |
| Fabric width-PowerWand   | 9/16" less than ordered width   |
| Fabric width - Cordless Lift   | 1/2" less than ordered width    |
| Shading height-All   | 1/8" less than ordered height   |
| END MOUNT-Standard Deductions (not available with Cordless Lift and 2 on 1 applications)               |                                 |
| Headrail   | 11/16" less than ordered width  |
| Fabric width-PowerWand   | 1-9/16" less than ordered width |
| Fabric width-Std loop, RC  | 1-1/2" less than ordered width  |
| Shading height-All   | 1/8" less than ordered height   |

| Bliss 1.1 Li-Ion                    |                                | Bliss 1.1 DC                        |                                |

## OPTIONS

### TWO-ON-ONE HEADRAIL

Cover patio doors and other large expanses by placing two independently operated shades side-by-side on the same headrail. Note there will be a 3/8" light gap between the two shades, see minimum/maximum requirements under product specification section.

### TILT ONLY SHADING

Ideal for sidelights or narrow windows.

- Shading cannot be raised, it can only be tilted open or closed.
- Hold down brackets are used to secure the bottomrail.

### CORDLESS LIFT

Raise, lower, and tilt shadings with cordless lift. A great choice for homes with children and pets, the lift, lower, and tilt mechanism are all controlled by the clear plastic handle attached to the bottomrail.

With your thumb on the front of the handle and fingers on the back, gently pull down to lower the shading. The hinged handle elegantly retracts when released. Continue pulling on the handle to lower the shadings and open the vanes.

To close the vanes and raise the shades, gently pull down on the handle (about 1") and release. The vanes will close and then the shading will retract into the headrail.

### FABRIC-COVERED HEADRAIL

Features a coordinating fabric wrapped onto the headrail to provide a soft fabric look from top to bottom. (See surcharge on pricing pages)

Note: Hardware Color Substitution is only available when the Fabric-Covered Headrail option is not selected

Note: When Fabric-Covered Headrail is selected the underlying headrail color will always be white and the end caps will still be color coordinated.

## OPTIONS

### OPTIONAL BACK COVER (INSIDE MOUNT)

Used with inside mounts to conceal the open rear side of the headrail for a more pleasing exterior look. Use of the back cover adds 1/4" to minimum inside mounting depths.

### OPTIONAL DUST COVER (OUTSIDE MOUNT)

Shields the fabric and internal headrail components from dirt, dust, and other contaminants.

### BACK COVER BRACKET

When a back cover is used, attach back cover brackets to the installation brackets before mounting them. Remove the tab from the top of the back cover brackets and both tabs at the rear of the installation brackets.

After mounting the installation brackets, install the back cover.

### SIDE-BY-SIDE VANE ALIGNMENT

When sheer shadings are installed side by side, vane alignment can be guaranteed within 1/4" only if:

- Shadings are ordered at the same time and in the identical style, color and height.
- Shadings that need to be aligned are specified on the order form (a note must be included in Special Instructions).
- Shadings exceeding combined width of 120" cannot be guaranteed

Note: Vane alignment cannot be guaranteed for Two-On-One Headrail and motorized shadings combined on the same order.

### ADJACENT SHADINGS

To span wide window openings, sheer shadings may be installed adjacently, so their headrails abut. The gap between the fabric panels of the adjacent shadings varies according to the control placement, as shown in the table below.

| CONTROL PLACEMENT                   | CCL, CL, MOTORIZED |
|-------------------------------------|--------------------|
| Adjacent (Abutting)                 | Sheer Shadings     |
| Left/Right Shadings                 | Center Gap         |
| Cordless Lift                       | 7/8"               |
| Right/Right Controls/Motor Position | 7/8"               |
| Left/Left Controls/Motor Position   | 7/8"               |
| Right/Left Controls/Motor Position  | 1-1/4"             |
| Left/Right Controls/Motor Position  | 1/2"               |

## ADDITIONAL NOTES

### SHADING ADJUSTMENT

Shadings should wind evenly and not skew to one side.

A balance weight on the bottomrail can easily be adjusted if the fabric winds unevenly on the roll when the sheer shading is raised. Uneven winding can cause damage to the edge of the fabric.

- If skewing does occur:
  - Ensure headrail was installed level; shim if necessary.
  - To release, insert a flat blade screwdriver into the weight lock and turn clockwise.
  - Adjust placement of weight in bottomrail, 1" at a time, toward side where fabric is gathering.
  - Secure the weight locks in position by turning them counter clockwise, after making the adjustment.
  - Raise shade, then lower, if necessary, adjust again.

### SHADING INSTALLATION

To mount the shading, insert the top of the headrail into the brackets between the locking tab and the bracket flange. Push the headrail into the brackets until the locking tab clicks in place.

To remove the shading, lift the locking tab to release the headrail, rotate the headrail forward, and pull it straight out.

### MAGNETIC HOLD-DOWN BRACKETS

Magnetic hold-down brackets secure the bottom of the shading to prevent swaying. Available upon request. Standard on tilt-only shadings.

# STANDARD SHADING OPERATION

## STANDARD SHADING OPERATION

Shadings are operated using a continuous cord loop. As shown in the illustration below, from the fully raised position [1] pulling down on the rear half of the cord loop lowers the shading [2, 3]. After it is fully lowered, continuing to pull down on the cord pivots the bottomrail and opens the fabric vanes [4]. When the vanes are fully open [5], limit stops in the headrail prevent further movement in that direction.

With the fabric vanes fully open, pulling down on the front half of the cord loop first closes the vanes [6, 7] and then raises the sheer shading [8]. When it is fully raised [1], limit stops again halt shading movement, preventing the bottomrail from being retracted too far into the headrail.

## Light Control

With the shading in the fully lowered position, the continuous cord loop is used to adjust the fabric vanes from open to closed, and anywhere in between. Light control is at your customer's fingertips. (Note: The degree of maximum vane closure varies slightly from the top to the bottom of the shading.)

## Vane Opening

Vane opening is the amount of unobstructed visibility between fully open vanes when looking through the shading at eye level. Vane opening for shadings is 1" to 1-1/2" depending on vane size and opacity.

- 2" Light Dimming = 1"
- 2" and 2-1/2" Translucent, 2-1/2" Light Dimming = 1-1/4"
- 3" Translucent and Light Dimming = 1-1/2"

## Vane Closure

When the vanes of a sheer shading are closed, they overlap each other, blocking the view. However, the vanes do not contact each other along the full length of the shading – they do not form a perfect seal against light leakage. This is most visible toward the bottom of the shading.

Vane closure is measured as the distance between the front and rear fabric facings 6" up from the lowest point of the bottomrail, with the shading fully lowered and the vanes closed, as illustrated here. Vane closure for all fabrics is 1".

**Note:** The degree of maximum vane closure varies slightly from top to bottom of the shading.

- Over-rotation can occur when the shading is completely lowered and vanes are opened. The bottom rail turns up to the inside of the opening when the vanes are in the horizontal position.

**Note:** Over-rotation is an inherent characteristic of Sheer Shadings. The amount of over-rotation may vary from shade to shade.

## PLEASE NOTE:

- Cord tensioner **MUST** be mounted to window casement or wall in order for the shade to operate.
- As with all textiles, Sheer Shading fabrics are subject to some variations. Slight wrinkles, puckering or bowing is inherent to textile products and should be considered normal, acceptable quality.

## OPERATION

### CORDLESS LIFT

Raise, lower, and tilt shadings with cordless lift. A great choice for homes with children and pets, the lift, lower, and tilt mechanism are all controlled by the clear plastic handle attached to the bottomrail.

With your thumb on the front of the handle and fingers on the back, gently pull down to lower the shading. The hinged handle elegantly retracts when released. Continue pulling on the handle to lower the shadings and open the vanes.

To close the vanes and raise the shades, gently pull down on the handle (about 1") and release.

The vanes will close and then the shading will retract into the headrail.
