Roller Shade

How to Place an Order

STEP 1 Choose your Shade Style

STEP 2 Choose your Fabric & Light Control

STEP 3 Choose your Options

Roller Shade

How to Measure

INSIDE MOUNT (IM) INSTALLATION

TO FIND WIDTH

Measure exact distance between inside surfaces of window frame at the top, middle, and bottom, and use the narrowest width. **DO NOT MAKE ANY WIDTH DEDUCTIONS.**

TO FIND HEIGHT

Measure exact distance from inside surface at top of window to sill. If there is no sill, measure height to point where shade is to reach.

OUTSIDE MOUNT (OM) INSTALLATION

TO FIND WIDTH

Measure exact distance between the outermost points where the shade is to be placed. This measurement should overlap each side of window frame by at least 1 1/2". Factory makes no deduction from your shade width dimensions.

TO FIND HEIGHT

Measure exact distance from where top of shade will be located to top of sill. If there is no sill or if shade is to overlap window frame, measure to point shade is to reach.

MEASURING TYPES FOR OUTSIDE MOUNT

Tip-to-Tip:

Tip-to-Tip Measure is the common measure type for most roller shades. Choosing this measure type will include the headrail "pegs" that mount the shade to the wall or frame.

Cloth-to-Cloth:

Cloth Measure is uncommon and should only be used for Outside Frame applications. The headrail is wider than the cloth of the shade which causes the "pegs" to extend beyond the width of the shade material. This total distance is 1 3/8" wide, or a gap of 11/16" on each side of the shade material.

NOTE: For outside mount applications allow the blind to overlap 1 1/2" to 3" on the sides, top and bottom of the window. You must add the overlap to your measurement; Levolor does not add width or height for overlap on Outside Mounted shades.

Roller Shade

Critical Dimensions

Reverse Roll

Fabric is rolled so that it hangs off the front of the roll. Reverse roll is a free option.

NOTE: Reverse roll is not available with the Cassette Valance option.

Scalloped Upgrade

Fabric drop limitation is reduced by 10 inches with scallop upgrade. Scalloped hem adds approximately 4" to the height of the roller shade and does not roll up into the shade.

Specifications and Deductions

Width		Height		Tolerances	
Minimum	Maximum	Minimum	Maximum	Width	Height
6"	144"	12"	120"	1/16"	1/2"

Fabric Width Reduction	Cordloop	Universal Brackets	Extension Brackets
Up to 1 1/8"	Left or Right	Yes	1 1/8"

Mounting Depths and Deductions

	No Valance	Standard Valance	Cassette Valance
Minimum Installation Depth	3"	3"	3"
Flush Mount Installation Depth	3 1/2"	3 1/2"	3 3/4"
Maximum Fabric Width Deduction	1 1/8"	1 1/8"	1 1/2"
Width Tolerance	1/16"	1/16"	1/16"
Height Tolerance	1/2"	1/2"	1/2"
Valance Height	N/A	3 1/2"	Sm - 2 1/2" Lg - 4 1/16"
Extension Bracket Projection	1 1/8"	1 1/8"	N/A

Standard Factory Deductions from Ordered Width		
	Cordless	Corded
Inside Mount	Up to 1 1/8"	Up to 1 1/2"
Outside Mount - Tip to Tip	Up to 3/4"	Up to 1"

Special Brackets (must be requested at time of ordering)

Hold-down Brackets

Hold-down brackets are available for securing the bottomrail in position. These brackets can stop a shade from bouncing and loosely swinging if the shade is hung on a door. Available only on outside mount.

Extension Brackets

Extension brackets are available for outside mount shades. When the shade must operate around an obstruction, these brackets project the shade away from the wall, allowing easy operation. Not available with hold-down brackets. Available only on shades smaller than 60"W x 70"H.

*Seam will be sewn across the width of the shade as close to the top as possible.

Fabrics with "RR" listed after their width limitations can be turned 90° for any full shade widths above these limits. This process is called "Rail Roding."

For any Rail Roded shade with a height greater than the posted RR limit, a seam will be sewn across the width of the shade occurring as close to the top as possible.

For scallop options, fabric drop limitation reduces by 10 inches.

Light Control Index

Each collection is rated for light control. This convenient indicator can be found next to the available colors grid on each pricing page and on the back of each fabric swatch in the sample book.

Cleaning Guide

Care Instructions

A brush-type vacuum attachment or feather duster should be used for cleaning. If your shade should become stained, you may clean it by dabbing the spot with a sponge dampened with lukewarm water test solution on indiscreet area first. Avoid contact with window cleaning products as these may discolor your shade. Ultrasonic cleaning is not recommended or covered by our warranty.

Roller Shade

Color Variation and Fabric Repeat Information

Color lot variations may occur due to the process of color application. For the best color match, order all shades for a room at the same time. Pattern availability and color lot match between orders cannot be assured. Any variation in color is in accordance with industry standards.

Fabric repeat information available on back of swatches.

Roller Shade

Options

VALANCE OPTION

Standard Valance

The Standard Valance is a 3 ½" wide grooved channel that contains the same fabric as the shade.

NOTE: For patterns where there are vertical lines, these lines will run horizontally in the valance.

Cassette Valance

A cassette is an enclosed valance with a curved front panel, with a matching strip of material/fabric inserted across the face of the cassette. The cassette comes in two sizes, determined by the size of the shade and the thickness of the fabric.

NOTE: The Cassette Valance is preselected for each fabric. It is available in four colors: white, black, brown and brushed aluminum.

STANDARD VALANCE

CASSETTE VALANCE

DECORATIVE HEM OPTIONS

Scallops

Decorative hems may be added to any roller shade by choosing from one of the styles shown below. Each hem must be finished with either a trim or fringe color.

NOTE: Scalloped hems add approximately 4" to the height of the roller shade and does not roll up into the shade.

The pull type for cordless roller shades with decorative hem is a coordinating tassel.

Decorative Trim

The trim is placed directly on the edge of the scallop while the 1" fringe hangs over the edge of the scallop. Please see page 9-10 of the Inspiration Guide within the sample book for additional information and photography. Decorative trim is not available to widths less than 26".

STANDARD CORDED CLUTCH CONTROL

Standard Corded Clutch system allows perfect positioning of the shade at any height. Pull only the cord to adjust the shade, keeping the fabric clean and undamaged.

Chain is stainless steel.

CORDLESS CONTROL

The design of our cordless control creates a clean profile across all of your windows, makes it easy to lift and lower your shade, and gives you peace of mind for homes with children and pets.

Continuous Cord Loop

Cordless

NO CHARGE OPTIONS

Cordless Pull Type Options

Tassel

Color-coordinated tassels let you raise and lower your shade without touching the fabric. Available on cordless.

Clear Hem Grip

Transparent hem grip lets you raise and lower your shade without touching the fabric. Available on cordless. Not available for scallop decorative hem.

Reverse Roll

Fabric is rolled so that it hangs off the front of the roll.

NOTE: Reverse roll is not available with the Cassette Valance option.

Extension Bracket

Available only on shades smaller than 60"W x 70"H.

MOTORIZATION OPTION

Wireless Radio Frequency (RF) Motorization

No line-of-site is required between the remote or switch and the shade in order to operate. The shade can be operated from up to 20 feet away through concrete walls. There are several types of controls offered with RF motorization as well:

Single-Channel Remote Control

This remote control controls all shades within range together.

Five-Channel Remote Control

This remote can be programmed to control shades on up to 4 individual channels or all shades together. This is a good option for homes with shades facing different directions.

Single-Channel Wall Switch

This option controls the shades in the same manner as the single-channel remote control. A professional installer or electrician should install this switch in your wall.

Five-Channel Wall Switch

The five-channel switch controls shades within range in the same manner as the five-channel remote control. A professional installer or electrician should install this switch.

Automatic Timer

The automatic timer feature can be programmed to operate shades at certain times of day. This is a great security or energy-saving feature for your home.

Terms and Conditions

Order Processing

Telephone Orders

Verbal orders are accepted as the dealer's responsibility. Each order will be repeated back by the Customer Service Representative. In certain instances, we may require written orders.

Duplicated Orders

All orders are confirmed after entry into our system. Customer Service is not responsible for duplicate orders caused by a written order following a telephone order or duplicate faxes.

Changes and Cancellations

All products are custom-made to your specifications under tight deadlines. Once production has begun on your order, changes and cancellations cannot be made.

Contract Orders

All Contract Orders must be processed through Contract Customer Service at 1-800-826-8021.

Claims and Returns

Defective Merchandise

All manufacturing defects must be reported to Customer Service within 30 days of receipt of shades. We may require the return of defective shades prior to repair or replacement.

Incorrect Merchandise

If any part of your shipment was made incorrectly, please advise Customer Service within 30 days. A replacement will be made at no charge if the problem was due to Levolor error. If the problem was due to dealer or customer error, the original order and replacement order will be full charge.

Returns for Repair

Prior to return for repair, contact Customer Service. We will request the order number, date, purchase order number, and type of product. Arrangements for return will be made at that time with directions as to how the shades should be returned. The package should be marked for easy identification both inside and outside, and should contain a written confirmation of the verbal repair instructions. Repairs should be packaged carefully. Product that has been mishandled or received in poor condition will be returned to the customer.

Chargebacks for unauthorized repairs or additional installation cannot be honored. All returns for repair are subject to freight charges.

Freight

- Shipments outside the continental U.S. are subject to freight charges.
- Chargeable parts and returns for repair are subject to freight charges.

Pricing and Terms

All prices are subject to change without notice. Until credit is approved, terms are cash with order. Standard terms are Net 30 days from invoice date.

Returns for Credit

Returns can be accepted only if prior authorization has been obtained from Customer Service. Authorization will include instructions as to how the merchandise should be returned. Unauthorized returns will be refused.

Freight Damage FedEx/FedEx Ground:

- If freight damage is visible, refuse the shipment. FedEx will inspect the damage and return to the shipping location. Contact Customer Service for further information.
- If freight damage is concealed, retain all packaging materials and contact Customer Service immediately (must be notified within 14 days).

Freight Damage Common Carrier:

- If freight damage is visible, refuse the shipment. The carrier will return the merchandise to the shipping location for inspection. Contact Customer Service for further information.
- If freight damage is concealed, retain all packaging materials and contact Customer Service immediately (must be notified within 14 days).
