## How to Measure

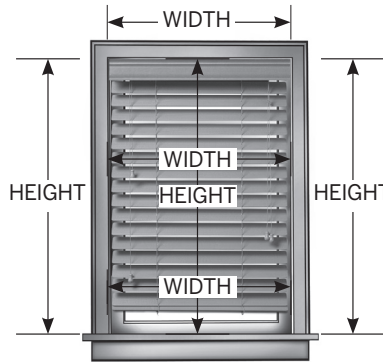

### INSIDE MOUNT INSTALLATION

#### TO FIND WIDTH

Measure exact distance to the nearest 1/8" between inside surfaces of window frame at the top, middle, and bottom, and use the narrowest width. Do not take any width deductions. Factory will take the appropriate deductions.

#### TO FIND HEIGHT

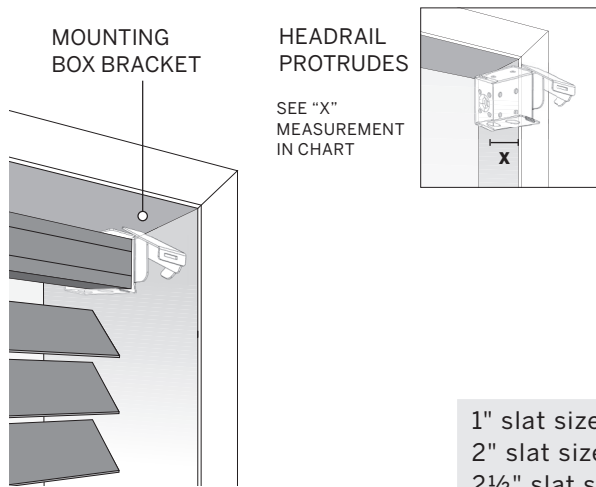

Measure exact distance to the nearest 1/8" from inside surface at top of window to sill at the left, middle and right and use the longest height. If you prefer blind not to touch sill, deduct 1/4". If there is no sill, measure height to point where blind is to reach.

#### STANDARD FACTORY DEDUCTIONS FROM ORDERED WIDTH:

Headrail	-1/2"
Slat Width	-1/2"
Valance	-1/8"

2 1/2" slat size 1 1/2" x 2 1/4"	1 1/4"	3"	3 7/8"***

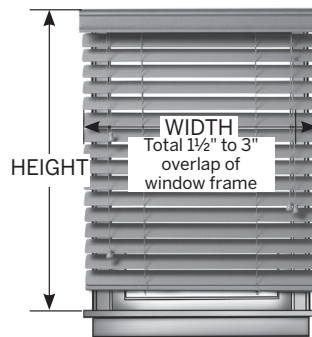

### OUTSIDE MOUNT INSTALLATION

#### TO FIND WIDTH

Measure exact distance to the nearest 1/8" between the outermost points where the blind is to be placed. For optimum light control, this measurement should extend at least 3/4" beyond the window opening on each side (or 1 1/2" for the entire width).

#### TO FIND HEIGHT

Measure exact distance to the nearest 1/8" from where top of blind will be located to top of sill. If there is no sill or if blind is to overlap window frame, measure to point blind is to reach.

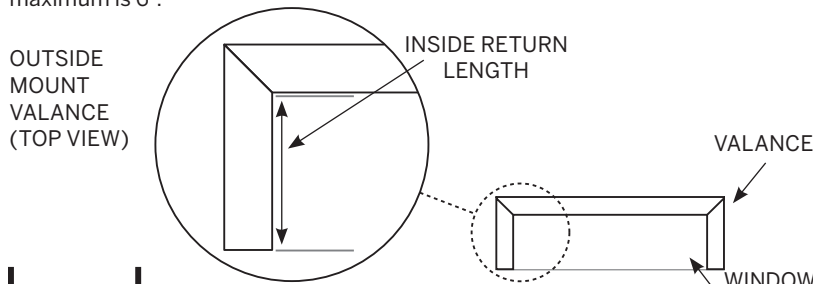

#### STANDARD FACTORY DEDUCTIONS FROM ORDERED WIDTH:

Headrail	-1/2"
Slat Width	0"
Valance	+1"

### VALANCE RETURN MEASUREMENT

To measure outside mount valance return length, measure the inside return length of the valance as shown. Minimum return length is 3/4", maximum is 6".

#### OUTSIDE MOUNT STANDARD VALANCE RETURN

WOOD/FAUX BLIND	INSIDE RETURN LENGTH*
2" Cordless	3 1/8"
2 1/2" Cordless	3 1/2"

2 1/2" Corded, Cord Tilt	3 1/4"
2 1/2" Corded, Wand tilt	3 1/2"
1" Corded	2 1/8"

\*These dimensions are for an outside mount blind with an outside mount valance. For an inside mount blind with an outside mount valance, a custom return length should be chosen. Otherwise, standard returns will need to be cut to size at home.

### Cleaning and Care Instructions

Keep your Kirsch® wood and faux wood blinds looking their best by periodically wiping them with a soft cloth, a dusting mitt, or the brush attachment from a vacuum cleaner.

- You can clean the blind hanging in place or you can take it down.
- By tilting the slats down, but not quite closed, you'll be able to clean most of the top surface of each slat.
- Do not use water, solvents, or abrasive solutions to clean the blind. This will cause damage to the blind which is not covered under warranty.
- Premium Hardwood Blinds: In very dusty environments, you may use a non-wax furniture polish to clean the blind.
- Variance and Visions™ Faux Wood Blinds: You may use a soft, lightly dampened cloth to clean your faux and composite wood blinds.
- Blinds with Privacy: Slats can be removed for cleaning. Slide out the slat, wipe clean, and return to its original position.
- With the tighter closure of Privacy, any slight warpage could be noticeable; simply flip the slat over to cover the light gap.
