SHEER SHADINGS

Pricing effective August 21, 2023 and supersedes all previous pricing. Subject to change by Alta Window Fashions.

Revised 7-1-24

SUMMARY OF REVISIONS

7-1-24 Revisions

Page	10	Change to Edge Gap chart
Page	12	Change to Adjacent Shading Chart

6-3-24 Revisions

All pages......New hardware update that includes updates to headrail with new features, new options, new control systems, new hardware colors, new color coordination, updated surcharges and new size standards. No changes to fabric collections or to price grids.

4-22-24 Revisions

Pages 4-6, 9-12, 15Removed references to Retractable Cord Control in compliance with the CPSC Voluntary Standard

3-1-24 Revisions

Page 2Color Coordination of SA3-901 changed from 180 Dove Gray to 426 Squirrel Gray

10-1-23 Revisions:

Page 2	Color Coordination of SL17B-1003 and SL14B-1003 changed from 469 Blue Creek to 885 Flex White

Oversize Common Carrier Delivery

All orders with any quantity of shades or blinds or any continuous valance 90" or more in width are considered oversize. Therefore, a net shipping charge per oversized unit will be assessed.

Oversized orders that require expedited shipping will be quoted and charged accordingly.

Please see General Information for additional freight and shipping charge information.

*Fabric-covered headrail is color-coordinated to fabric. If an override is chosen, please choose from a color in the Fabric- Covered Headrail color-coordination chart on page 4 *When Continuous Loop Control is ordered, the shade is color coordinated to one of the tensioners in the chart on Page 4. You may override the tensioner color and choose another color if desired.

*Light Filtering/Translucent - Softly diffuses sunlight and provides a moderate degree of privacy as only shadows will be discernible.

*Room Darkening/Light Dimming - Dramatically reduces light. Provides privacy against most direct light. Images, shapes and people are not discernible.

	LIGHT CONTROL DEFINITIONS
А	Sheer - Filtered light for an open, softened view, UV protection and glare reflection, when privacy is not a concern.
В	Semi-Sheer - Softly diffuses light while offering minimal privacy. Images, shapes and people can be seen with some clarity.
С	Light Filtering/Translucent - Softly diffuses sunlight and provides a moderate degree of privacy as only shadows will be discernible.
D	Room Darkening/Light Dimming - Dramatically reduces light. Provides privacy against most direct light. Images, shapes and people are not discernible.
E	Blackout - Provides the ultimate in light control and privacy; perfect for bedrooms, nursery, or media rooms. Pair with side channels or privacy light block for additional privacy. (Side channels where applicable)

STANDARD FEATURES

· Light Block Strip on top of headrail for Inside Mounts(see page 13 for details)

Color Coordinated Headrail

· Snap-in Bracket Style

- **OPTIONS: EXTRA CHARGE**
- Fabric Covered Headrailadd \$35 per shading
- Hardware Color Substitution Surchargeadd \$30 per shading
- Cordless Lift Surcharge......add \$90 per shading
- Tilt Only Shadings 6" to 11-7/8" (Continuous Loop Control Only)
- Two-On-One Headrail price as 2 separate shades
- Control Positions (R or L)
- Spacer Blocks

Notes:

- Hardware Color Substitution is only available when the Fabric-Covered Headrail option is not selected. Please review Collection Information pages for Coordinating Hardware Color - When Fabric-Covered Headrail is selected the underlying headrail color will always be white and the end caps will still be color coordinated.

FEATURES & OPTIONS

FEATURES	
# of fabric styles	13
# of Colors	97
Headrail size	3-1/4" X 3-1/16"
Bracket style	Snap-in
Continuous Loop Control tilt and lift	Yes, Standard
Raise, lower and tilt with one cord	Yes
Universal Cord Tensioner	Color Coordinated
Warranty	Lifetime Limited

OPTIONS - EXTRA CHARGE	
Hardware Color Substitution	Yes
Cordless Lift	Yes
Fabric Covered Headrail	Yes
PowerWand	Yes
Bliss Automation	Yes
Somfy Automation	Yes
OPTIONS - NO CHARGE	
Tilt Only (available on continuous loop control only)	Yes
Two-On-One Headrail Option	Yes
Control positions	Right or Left
Motor Positions- Bliss, Somfy	Right or Left * (see note below)
Control Positions PowerWand	Right or Left * (see note below)
Wand Color - PowerWand	White, Black, Brown, Vanilla, Gra (see inset below)
Wand Length - PowerWand	1 ft, 2 ft, 3ft, 4 ft, 5 ft, 6ft
Spacer blocks	Yes
Extension brackets	Yes
Hold-down brackets	Yes
Back cover (Inside or End Mounts)	Yes
Dust cover (Outside Mounts)	Yes
Cord length (See Continuous Loop Control Drop Chart)	Yes
Specialty shapes	No
Tile cut-out	No

Note: For 2 on 1 shades, motors must be placed at the edges(far-left and far-right) of the shades.

Powerwand Colors

CONTINUOUS LOOP CONTROL CHART

SHADING HEIGHT	CORD LOOP DROP
16" to 26-7/8"	1 ft. (white-only)
27" to 39-7/8"	2 ft.
40" to 59-7/8"	3 ft.
60" to 83-7/8"	4 ft.
84" to 107-7/8"	5 ft.
108" to 120"	6 ft. (white-only)

OPTIONAL CORD DROPS (White Cord Only)	
CORD DROP INCREMENTS	
6'-12'	6" increments
12'-16'	12" increments

NOTE: 18" white only cords available upon request

MOUNTING REQUIREMENTS

INSIDE MOUNT (IB)		
Continuous Loop Control, Retractable Wand, Cordless Lift, Bliss Automation, Somfy Automation & PowerWand		
Minimum casement depth*	1"	
Minimum casement depth*, fully recessed 3-5/16"		
Minimum rear fabric clearance	1/8"	

OUTSIDE MOUNT (OB)		
Continuous Loop Control, Retractable Wand, Cordless Lift, Bliss Automation, Somfy Automation & PowerWand		
Minimum mounting surface height	1"	
Recommended width overlap per side	3"	
Minimum rear fabric clearance 1/8"		
END MQUINT (EB)		

Continuous Loop Control, Retractable Wand, Cordless Lift, Bliss Automation, Somfy Automation & PowerWand		
Minimum mounting surface depth*	1-1/4"	

* Add 1/4" to minimum depth dimensions if optional back cover is used for inside or end mounts.

* End Mount not available on 2 on 1 applications.

The external battery pack available for Bliss 1.1 DC or for Sonesse 28 WireFree RTS / ZIGBEE DC are approximately 10" in length and 1" x 1". Consider ordering one of the Battery Pack Extensions below for mounting flexibility.

BLISS

48" Battery Pack Extension (Motor to Battery) Part #62207000

Control side	7/8"
Non-control side	5/8"

OPTIONS

TWO-ON-ONE HEADRAIL

Cover patio doors and other large expanses by placing two independently operated shades side-by-side on the same headrail. Note there will be a 3/8" light gap between the two shades, see minimum/maximum requirements under product specification section.

RETRACTABLE WAND

This system features a wand control for enhanced child safety. With one click, the fabric panel drops and the vanes open. Pull the wand straight down to close the vanes or raise the shading.

TILT ONLY SHADING

Ideal for sidelights or narrow windows.

- Shading cannot be raised, it can only be tilted open or closed.
- Hold down brackets are used to secure the bottomrail.

CORDLESS LIFT

Raise, lower, and tilt shadings with cordless lift. A great choice for homes with children and pets, the lift, lower, and tilt mechanism are all controlled by the clear plastic handle attached to the bottomrail.

This cordless system works by simply pushing up with your hand to raise the shading and pulling down to lower it. The shadings stay right where you put them.

FABRIC-COVERED HEADRAIL

Features a coordinating fabric wrapped onto the headrail to provide a soft fabric look from top to bottom. (See surcharge on pricing pages)

Notes:

- Hardware Color Substitution is only available when the Fabric-Covered Headrail option is not selected

- When Fabric-Covered Headrail is selected the underlying headrail color will always be white and the end caps will still be color coordinated.

- Fabric-covered headrail is color-coordinated to fabric. If an override is chosen, please choose from a color in the Fabric- Covered Headrail color-coordination chart on page 4.

OPTIONS

ADJACENT SHADINGS

To span wide window openings, sheer shadings may be installed adjacently, so their headrails abut. The gap between the fabric panels of the adjacent shadings varies according to the control placement, as shown in the table below.

ABUTTED SHADINGS FABRIC GAP	
Cordless Lift	All abutting configurations 7/8"
Retractable Wand	Non-control sides abut 7/8"
Retractable Wand	Non-control sides abut control side 1-1/8"
Retractable Wand	Control sides abut 1-3/8"
Continuous Loop Control	Non-control sides abut 7/8"
Continuous Loop Control	Non-control sides abut control side 1-1/8"
Continuous Loop Control	Control sides abut 1-3/8"
Automation	All abutting configurations 1"

Note: Outside mount (OB) shadings are not recommended for bay windows or abut-and-pass applications.

ADDITIONAL NOTES

SHADING ADJUSTMENT

Shadings should wind evenly and not skew to one side.

A balance weight on the bottomrail can easily be adjusted if the fabric winds unevenly on the roll when the sheer shading is raised. Uneven winding can cause damage to the edge of the fabric.

- If skewing does occur:
 - Ensure headrail was installed level; shim if necessary.
 - To release, insert a flat blade screwdriver into the weight lock and turn clockwise.
 - Adjust placement of weight in bottomrail, 1" at a time, toward side where fabric is gathering.
 - Secure the weight locks in position by turning them counter clockwise, after making the adjustment.
 - Raise shade, then lower, if necessary, adjust again.

SHADING INSTALLATION

To mount the shading, insert the top of the headrail into the brackets between the locking tab and the bracket flange. Push the headrail into the brackets until the locking tab clicks in place.

To remove the shading, lift the locking tab to release the headrail, rotate the headrail forward, and pull it straight out.

MAGNETIC HOLD-DOWN BRACKETS

Magnetic hold-down brackets secure the bottom of the shading to prevent swaying. Available upon request. Standard on tilt-only shadings.

LIGHT BLOCK STRIP

An integrated light block strip comes standard on all inside mount headrails. The light block strip can be removed by removing the headrail decorative end cap. Using a square drive screwdriver, back the screw out of the endplate 1/8", keeping the screw attached. Gently pull the endplate to separate from the headrail. Using a pair of needle-nose pliers, grab the light-blocking strip and pull it out of the headrail channel (see photos to the right). Push the endplate to seat back into the headrail. Tighten the endplate screw and replace the end cap cover.

CONTINUOUS LOOP CONTROL OPERATION AND NOTES ON VANE OPENING, VANE CLOSURE AND LIGHT CONTROL

STANDARD SHADING OPERATION

Shadings are operated using a Continuous Loop Control. As shown in the illustration below, from the fully raised position [1] pulling down on the rear half of the cord loop lowers the shading [2, 3]. After it is fully lowered, continuing to pull down on the cord pivots the bottomrail and opens the fabric vanes [4]. When the vanes are fully open [5], limit stops in the headrail prevent further movement in that direction.

With the fabric vanes fully open, pulling down on the front half of the cord loop first closes the vanes [6, 7] and then raises the sheer shading [8]. When the shade is fully raised [1], limit stops again halt shading movement, preventing the bottomrail from being retracted too far into the headrail.

Light Control

With the shading in the fully lowered position, the the selected control system is used to adjust the fabric vanes from open to closed, and anywhere in between. Light control is at your customer's fingertips. (Note: The degree of maximum vane closure varies slightly from the top to the bottom of the shading.)

Vane Opening

Vane opening is the amount of unobstructed visibility between fully open vanes when looking through the shading at eye level. Vane opening for shadings is 1" to 1-1/2" depending on vane size and opacity.

- 2" Light Dimming = 1"
- 2" and 2-1/2" Translucent,
 2-1/2" Light Dimming = 1-1/4"
- 3" Translucent and Light Dimming = 1-1/2"

Vane Closure

Measured

Here

6"

VANE CLOSURE

Vane Closure

When the vanes of a sheer shading are closed, they overlap each other, blocking the view. However, the vanes do not contact each other along the full length of the shading – they do not form a perfect seal against light leakage. This is most visible toward the bottom of the shading. Vane closure is measured as the distance between the front and rear fabric facings 6" up from the lowest point of the bottomrail, with the shading fully lowered and the vanes closed, as illustrated here. Vane closure for all fabrics is 1".

Note: The degree of maximum vane closure varies slightly from top to bottom of the shading.

 Over-rotation can occur when the shading is completely lowered and vanes are opened. The bottom rail turns up to the inside of the opening when the vanes are in the horizontal position.

Note: Over-rotation is an inherent characteristic of Sheer Shadings. The amount of over-rotation may vary from shade to shade.

PLEASE NOTE:

- Cord tensioner MUST be mounted to window casement or wall in order for the shade to operate.
- As with all textiles, Sheer Shading fabrics are subject to some variations. Slight wrinkles, puckering or bowing is inherent to textile products and should be considered normal, acceptable quality.

OPERATION

CORDLESS LIFT

Raise, lower and tilt shadings with cordless lift. A great choice for homes with children and pets, the lift, lower and tilt mechanism are all controlled by the clear handle attached to the bottomrail. This cordless system works by simply pushing up with your hand to raise the shading and pulling down to lower it. The shadings stay right where you put them.

- Slowly and steadily pull down on the bottom rail handle to lower the shading.
- With your thumb on the front of the handle and fingers on the back, gently pull the back of handle down and away from the shading to open the vanes.
- Use the handle to tilt the vanes to the desired open/closed position.
- Push down on the front of the handle to close the vanes.
- Slowly and steadily push up on the handle to raise the shading.

RETRACTABLE WAND

• Adjust the wand length as necessary for customer circumstances. The Retractable Wand should fall between the shoulder heights
