NATURAL WOVEN SHADES

by Alta

design simplified™

Ready to travel to a place where natural beauty meets effortless style? Crafted with organic materials and a faraway feel, Natural Woven Shades offer one-of-a-kind textures, versatile liner options, and gorgeous colors that add a professional touch and breezy charm. The perfect complement to any décor—no passport required!

Welcome home.

Natural Woven Shades with Automation
NO LINER | Komodo Onyx KOM-8002

EMBRACE THE EXTRAORDINARY

Each Natural Woven Shade is handcrafted, which means every shade is perfectly unique. Their warm, natural textures add a cozy, welcoming feel to any room—instantly transforming your house into a home.

made by hand

We set the bar high to ensure that every shade brings top-tier quality and its own distinctive style.

Natural Woven Shades with Automation

NATURAL ELEGANCE

Sure, the dramatic shadows and dappled light have designers raving about Natural Woven Shades, but the real story lies in their eco-friendly construction. Renewable, earthborn materials such as jutes, reeds, and grasses reduce the environmental impact of each shade while filtering light in a way that can only be rivaled by Mother Nature herself.

a touch of nature

Our natural materials are as durable as they are beautiful so that you can relax in an inviting, earthy vibe that's designed to last a lifetime.

BLISS™ ASSIST

Elegance meets ease with our tech-savvy BLISS™ Automation—smart-home innovation that lets you control your shades from anywhere, from a smart device or a remote. It'll change the way you see your shades.

ADVENTURES IN AUTOMATION

Elevate your experience with our automation systems. From the wirefree convenience of rechargeable motors to the power of voice-control operation, to being compatible with existing smart-home technology, at home or away, automation makes life easier.

AUTOMATION

The ultimate in ease and convenience, our automated systems control all of your shades with a remote, an app on your smart device, or even your voice.

POWERWAND™

The PowerWand™ lifts and lowers shades with the touch of a button. PowerWand™ is affordable and rechargeable, too.

At Alta, we want our treatments to treat you well. That's why our focus is on safety, convenience, and reliability. Beautiful form meeting beautiful function through stellar advancements in automation. Scan the QR code to learn more about our latest control options.

OTHER CONTROL OPTIONS

A light push or pull on the handle lifts or lowers the shade to any position. With no visible cords, cordless shades offer a clean look and provide added child and pet safety.

Raising oversized or heavy shades is easy and convenient. The loop remains a constant length while the cord tensioner eliminates dangling cords for enhanced child safety.

SHADE STYLES

The valance is positioned in front of the shade and hides the headrail and hardware. Relaxed folds stack softly—rather than roll—when raised.

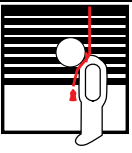

There's no valance here. Just a clean, flush mount that keeps those surface planes aligned and the hardware hidden. A back valance conceals the hardware from the exterior.

A single shade operates from the top down or the bottom up for more light control and privacy options.

⚠️ WARNING

⚠️ ADVERTENCIA

Window Blind Cord Strangulation Risk
Window Blinds with a damaged or loose tension device or retractable cord that fails to fully retract pose a stangulation risk to children. To avoid this potential strangulation risk, consider purchasing cordless products or products with inaccessible cords.

Riesgo de Estrangulamiento en Cuerdas de Persianas
Las persianas con un dispositivo tensor suleto o danado o con una cuerda retractable que no se ajusta completamente representan un riesgo de estrangulacion para los ninos. Para evitar un posbiel riesgo de estrangulamiento, considere comprar productos inalambricos o productos con cuerdas in acessibles.

Plastic Chain and Tensioner Colors
Black, Gray, White, Vanilla, and Brown

Optional Metal Bead Chain Colors
Gunmetal, Oil Rubbed Bronze, and Stainless Steel

MOUNTING OPTIONS

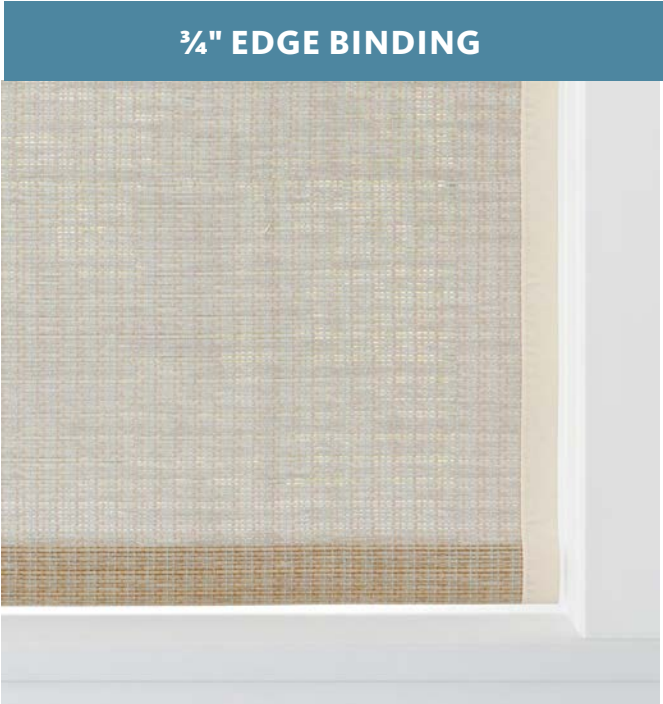

Choose an inside mount for a flush finish. Ensure your window has the proper mounting depth.

Choose an outside mount for the greatest light control and for shallow-depth windows.

DESIGN OPTIONS

Add a decorative accent and protect the shade edges with a 3/4" or 1 1/2" binding. Our sewn bindings lend durability, structure, and a clean appearance.

Two or three independently operating shades share the same headrail for a more unified look. This is ideal for wide windows and patio doors.

LIGHT YOU CONTROL

Explore a variety of light and privacy options to suit every unique scenario. Whether you're looking for the bright and airy feel of a shade with no liner, the total privacy of a full liner, or something in between, the decision is up to you! Your home—your rules.

Natural Woven Shades with Cordless Lift
ROOM-DARKENING LINER | Komodo Natural KOM-8001

be shade savvy

Fabric liners are a great way to boost your shades' lifespan. They stave off fading, and they can even help cut energy costs. Adding a liner is a simple yet practical upgrade that's available on all styles!

CUSTOMIZE LIGHT WITH LINERS

Our shades help diffuse the glare of the sun—beautifully. Want even less outdoor light and more privacy? Add our light-filtering liners. And for maximum darkness and serenity, opt for our room-darkening liners; they're perfect for bedrooms or street-facing spaces.

WHAT TO EXPECT

COLOR AND FABRIC VARIATION

Natural Woven Shades are created from natural wood, reeds, bamboo, and grasses.

- Over time, some patterns may turn slightly darker or lighter in color, depending on the material.
- Variations in stain, pattern irregularities, and knots are unique characteristics that contribute to the natural beauty of the shade.

SHADE HEIGHT AND ALIGNMENT

- It's common for woven shades to stretch slightly in length over time due to the natural fibers of the material and the characteristics of some weaves. The average stretching amount is approximately ½" for every 3' of shade length, plus or minus ¼".
- Due to the woven construction of our shades, yarns may shift during shipping. This shifting may cause a slight shortening of length or uneven edges.

Easy Remedies:

- Height: If after installation, your shade is slightly shorter than the ordered height, simply grasp the bottom of the shade, and gently pull to stretch the product to its full height.
- Uneven Edges: Lightly tap the edge of the shade with a flat surface (e.g., ruler) until it's even.
- Shades that have the same height measurement, fabric style, lift system, and mounting type should stack evenly within tolerance, especially if fabricated at the same time. Shades that need to be aligned must be specified on the order form (a note must be included in Special Instructions).
- Fabric pattern alignment is not guaranteed due to the natural attributes of the fabric.

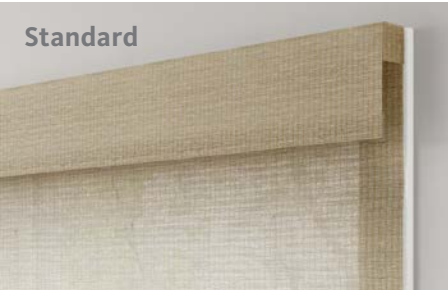

STANDARD vs. WATERFALL

STANDARD

- The shade material falls off the back of the headrail and has a matching front valance.
- Controls are in front of the shade for Continuous Loop Control and PowerWand™.

WATERFALL

- The shade material falls off the front of the headrail.
- Outside-mounted Waterfall shades do not have a valance.
- Shades ordered as inside mount will have a back valance to conceal the components.
- Continuous Loop Control and PowerWand™ are not available with Waterfall shades.

WHAT TO EXPECT

MATERIALS

Bamboo is a perennial grass known for its rapid growth and resilience. Bamboo is eco-friendly, carbon neutral, and extremely versatile.

Bamboo Filament is naturally derived from the bamboo plant. It's an environmentally friendly alternative to synthetic fibers, and it offers exceptional strength.

Kenaf is a fast-growing plant of the hibiscus family, cultivated for its fiber, which can be used as a jute substitute.

Jute is an eco-friendly fiber because it's biodegradable and renewable. It is known for its tensile strength and it's ability to withstand significant wear.

Jute Pulp Thread is created by spinning jute fibers into a coarse and strong thread.

Grasses of the Poaceae family constitute one of the most ecologically and economically important of all plant families.

Paper is a versatile material with many uses. Different types of plants and fibers—such as bamboo, wood pulp, and cellulose fibers—can be used for paper production.

Polyester is one of the world's most popular textiles, displaying a wide array of useful properties and practical applications.

Linen Yarn is a strong, durable fiber made from the cellulose fibers that grow inside of the stalks of the flax plant.

WHAT TO EXPECT

INHERENT CHARACTERISTICS

Natural Woven Shades fabrics are created using lightweight yet durable materials. Hand-fashioned, they combine natural fibers into masterful designs rich in textures and personality, letting the innate beauty of the materials show through.

Our unique fabrics and patterns use a variety of natural materials that are harvested year round and woven together by hand. Our materials are carefully sourced to ensure consistency in appearance, yet each handwoven roll will have its own special characteristics. What could be perceived as imperfections in the fabric are indeed part of the fabric’s natural beauty and distinctive charm.

The natural shape and finish of reeds and sticks are unique and varied. Each is artistically woven into the fabric for support and beauty.

Handcrafted materials are tied together during the weaving process, and this will create knots on the surface, adding dimension and depth.

As in nature, the colors of fibers, reeds, and grasses are uneven yet harmonious.

WHAT TO EXPECT

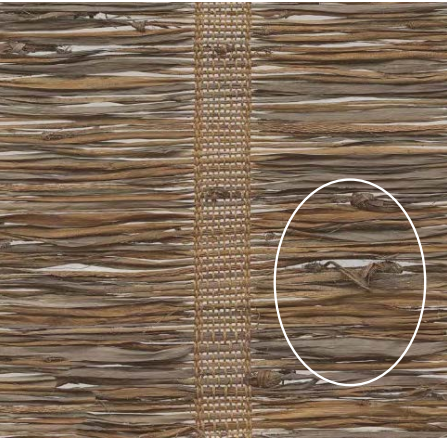

INHERENT CHARACTERISTICS

Aside from the natural characteristics shown to the left and below, these are some additional distinctive qualities found in Natural Woven Shades:

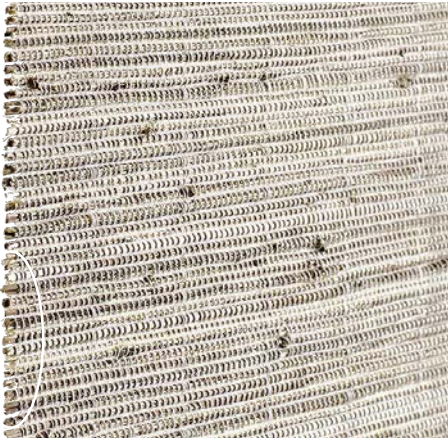

- Due to the opacity of some sheer and semi-sheer fabrics, the lift rings on the back of the shades might be visible. This is an acceptable fabric characteristic.
- Some fabrics may have slight fraying where yarns come off the edge of the fabric. Do not pull the yarn. Instead, please trim with scissors.

Space between the reeds.

Pulled grasses.

Natural fibers are not perfectly finished on the edges, and will feather and fall unevenly, as they do in nature.

WHAT TO EXPECT

SHADE OPACITY AND LINERS

Each fabric has its own unique opacity due to the natural characteristics of its materials and patterns. This variation affects light control and privacy, providing a range of options to match your needs. In some cases, adding a liner may be necessary to achieve the desired level of light filtering or privacy.

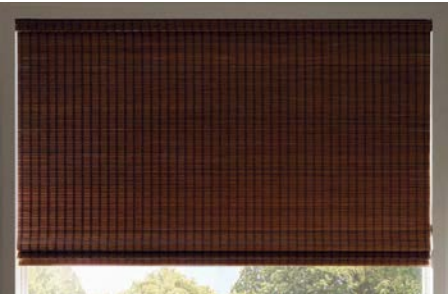

The photos below display fabrics of varying opacity without a liner.

Sheer materials softly diffuse light, offering minimal privacy and allowing images, shapes, and people to be seen clearly.

Semi-opaque materials provide moderate privacy by diffusing sunlight, making only shadows discernible.

Opaque materials dramatically reduce light, ensuring privacy from most direct light, preventing images, shapes, and people from being visible.

Shades without a liner

Shades with a liner

Add a light-filtering or room-darkening liner to achieve the amount of privacy and light control that suits you best. We offer shades without liners (left) as well as shades with attached liners (right).

Note: Adding a liner can change the appearance of the shade material.

WHAT TO EXPECT

ATTACHED LINERS

- Liners are attached to the back of the woven shade, and both operate together for optimal privacy and light control.
- Liners are available on all Natural Woven Shade configurations.
- Liners are neutral white to the street side. Reverse liners (e.g., color to the street side and neutral white to the inside) must be specified upon ordering.
- When a liner is selected, both the shade and the valance will come with the liner.
- Adding a liner to the back of the shade may make the color within the material appear more vivid.
- Light, coming from the sewing pinholes on the liner, may be visible through the shades.
- Room-darkening patches will be used in all operating systems to minimize the light coming through the pinholes.
- Room-darkening patches are not available with a reverse liner. Patches come in white only.
- When edge bindings are also ordered, the lining will be sewn under the binding.

WHAT TO EXPECT

EDGE BINDING

View the edge bindings sample deck for color selection.

- Narrow and wide twill edge bindings are available in nine colors.
 - » Black (¾" and 1 ½")
 - » Jute (¾" and 1 ½")
 - » Linen (¾" and 1 ½")
 - » Sepia (¾" and 1 ½")
 - » Snow (¾" and 1 ½")
 - » Amber (¾" only)
 - » Cream (¾" only)
 - » Grey Mist (¾" only)
 - » Iron (¾" only)
- These options are available on all Natural Woven Shade fabrics.
- Bindings are sewn to the woven material for durability, structure, and a cleaner appearance.
- Edge bindings are recommended for shades using Continuous Loop Control operation to prevent fraying of the material edges.
- Edge bindings are available in a number of configurations:
 - » Shade sides and bottom only; none on valance
 - » Shade sides only; none on valance
- Valance returns do not include bindings.

Note: Some wrinkles and waves are inherent in shades with edge binding, given that the edge binding materials do not stretch.

Represents the sample card.
Not the actual colors.

WHAT TO EXPECT

HEADRAILS, VALANCES, AND VALANCE RETURNS

- Headrail size will vary by operating system.
- Valances are standard on all Natural Woven shades.
- Two-on-One Headrail shades feature a continuous valance.
- Valances for a Two-on-One or Three-on-One Headrail over 96" will be spliced.
- Valance side returns are standard for outside-mount shades and are optional for inside-mount shades.
 - » Additional headrail width deductions are taken when shades are ordered as inside mount with returns.
- Return size is determined by the control system and headrail size.
 - » Return heights are shorter than the valance height to prevent the shade from hitting the returns when the shade is fully raised.

Operating System	Valance Height	Headrail Size	Return Width	Return Height
Cordless Lift	6"	1 ½"	1 ½"	2"
Motorized	6"	2 ½"	2 ½"	4"
PowerWand™	6"	2 ½"	2 ½"	4"
Continuous Loop Control	6"	2 ½"	2 ½"	4"

Cordless Lift
1 ½" Headrail • 2" Return Height

Continuous Loop Control • Motorized • PowerWand™
2 ½" Headrail • 4" Return Height

Two-on-One Headrail Continuous Valance

PRODUCT CARE AND CLEANING

- **Dusting:** Dust your Natural Woven shades regularly using a feather-like duster or cylindrical dust brush specially designed for shades.
- **Vacuuming:** Use a handheld vacuum with low suction for more thorough dust removal.
- **Compressed air or hair dryer:** Use a can of compressed air or a handheld hair dryer on the “cool” setting to blow off dust and debris.
